Subject: Fingerprint Sampling
Attachments: ATT00001.txt

Richard,

We have kept the fingerprint samples on ice since taking them, they have not been sent out. We wanted to ensure that you wanted to move forward with it, but needed to get the samples before all of the soil was excavated. If it is not your intent to move forward with it, we would like to know if you would like for them to be sent for holding. If not, we would like to discard of the samples while still on-site so that they are included with the waste stream already set.

I spoke to the lab this morning for costing. The fingerprint samples are \$500 per sample and for the C8/C40 there would be a total of 8 samples totaling \$4,000 for the lab analysis. This does include any funds that would be needed on the START side to continue forward.

Faye Walstead
